

Indoor Air Quality

The School Board recognizes its responsibility relative to student, employee, and visitor health and safety, and the need for a comprehensive program designed to provide a healthy, safe, and secure environment on Corporation property and at Corporation-sponsored activities. To achieve this, it is the intent of the Board that the Corporation will avail itself of the most current, proven technologies in the fields of health, safety, and environmental sciences.

The Corporation appointed Indoor Air Quality Coordinator will oversee the district's monitoring of carbon dioxide and humidity levels in buildings. The IAQ Coordinator will also mitigate any water intrusion into buildings.

Live animals shall be allowed in the classroom for educational purposes with the prior approval of the principal. No live animal will be allowed in the classroom longer than nine (9) weeks. When bringing an animal into the classroom, considerations must be given to students or staff who may be allergic to the animal. In advance of the animal being brought to school, a notification will be sent home with the students in that class informing parents of the type of animal that will be coming into the classroom. Parents will have an opportunity to notify the teacher or the principal if their child is allergic to the animal. If a parent responds about a concern regarding a possible allergic reaction to the animal, the principal and teacher shall discuss options that may be considered. The name of the student with the allergy shall remain confidential. If after an animal is brought to class and school officials become aware that an individual did have an allergic reaction, the school shall resolve the issue and provide the necessary cleaning of all surfaces in the classroom to remove the allergen. The care of an animal is the responsibility of the teacher

The district's Indoor Air Quality Coordinator is Tim Leer. Email: tleeer@fairfield.k12.in.us
